

Personal Statement

I am a **manual Software Tester with six years of agile testing experience** and a huge focus on collaboration and team culture. I have worked on **test plan/ test suite/ test case creation as well as integration, regression, functional, usability, and blackbox testing**. I **led a small team** of testers as a test lead and have effectively served as a liaison between teams for up to five teams in **Scrum development environments**. Further I have a drive to stretch so I am branching out into test automation. I find solutions and get things done. But even in the thick of the most serious testing, I always have a dad joke handy to keep folks smiling.

Skills

- Test case, test plan, test suite creation
- Functional, Integration, Regression, Exploratory, Accessibility, Integration Testing (Black Box and some Gray Box, white box)
- Manual API testing, some test automation
- Front end web testing, accessibility testing
- Using and writing SQL scripts to source test data and verify test results
- Testing in an agile testing environment primarily scrum
- Teamwork and high collaboration
- Strong written and verbal communication skills
- Learning and working within regulatory requirements
- Communicating across roles
- Presenting, instructing and mentoring

Technologies

Testing Tools: TestRail, Swagger, Postman API

Development and Deployment: Visual Studio, GitHub, Azure DevOps, Octopus Deploy, TeamCity

Project Management: Jira, Confluence, Trello, Asana

Database and Analysis Tools: SQL Server Management Studio, SumoLogic, Kibana

Languages: Javascript, C#, Postman Script

Relevant Experience

CBTS, Remote- QA Engineer (Contract) (March 2023 - March 2024)

- **Adaptability & Problem-Solving:** Quickly learned unfamiliar systems to alleviate pressure on the QA testing team, proactively tackling complex systems with a steep learning curve.
- **Project Delivery & Exceeding Expectations:** Supported the successful delivery of a troubled project by exceeding expectations, increasing test workload from 25% to 33% of the test plan despite last-minute requirements and tight deadlines.
- **Leadership & Initiative:** "Demonstrated leadership potential by taking the initiative during test strategy formation after a large team reorganization, helping to maintain project momentum.
- **Collaboration:** Partnered with domain experts QAs and developers to adapt to system testing needs, document intricacies, and establish efficient testing procedures for complex systems.

WTW, Tempe, AZ / Remote - Benefit Advisor, QA Analyst, QA Specialist (July 2017 - December 2022)

- **Subject Matter Expert & Team Leadership:** Spearheaded a team of 2 QA testers as an SME for a highly integrated system, fostering high collaboration and skills development (SQL, GitHub, Octopus Deploy, test automation with Postman) on the team.
- **Mentorship & Communication:** Mentored 7 new team members and served as a point of contact for cross-functional teams, facilitating communication by translating business requirements for technical teams and technical constraints for non-technical stakeholders.
- **Test Strategy & Documentation:** Coordinated the test strategy for 2 Scrum teams, streamlined QA processes despite resource constraints, and maintained up-to-date documentation despite frequent system changes.
- **Collaboration:** Promoted and championed effective communication and collaboration within and across teams and roles to ensure compliant, user-friendly software and organized deployments.

Education

Highschool Diploma - East Valley Academy (2008)

B.S. Earth and Space Exploration with a concentration on Astrobiology and Biogeosciences - Arizona State University (in progress)

Certificates

Level 1, Level 2, and Level 3 Certificates (2024) - Indie Game Academy - Game Development Certificates

AI Fundamentals (2024) - IBM Skillshare - Basics of Artificial Intelligence and Machine Learning

Responsive Web Design (2021) - Free Code Camp - HTML, Javascript, and CSS course
